ISO Compliance Management

Nov 24 – 25, 2025   **PIM, Islamabad**   **Rs. 41,000/=**

Note: The Fee is Exclusive of GST.

Course Description

This course provides an in-depth understanding of ISO standards and how to manage compliance within organizations. Participants will learn how to implement, monitor, and improve ISO-compliant processes, ensuring that their organization meets international standards for quality, environmental management, safety, and more. The course covers ISO 9001 (Quality Management), ISO 14001 (Environmental Management), ISO 45001 (Occupational Health & Safety), and other relevant standards.

COURSE CONTENTS:

1. Introduction to ISO Standards and Compliance

- **Key Points:**
- Overview of ISO standards and their importance.
- Understanding compliance and certification processes.
- **Explanation:**
- This module introduces the participants to the world of ISO standards, explaining the significance of compliance in maintaining quality, safety, and sustainability within organizations.

2. ISO 9001: Quality Management Systems

- **Key Points:**
- Principles of quality management.
- Implementing and maintaining a quality management system (QMS).
- **Explanation:**
- Participants will learn how to apply ISO 9001 standards to ensure products and services consistently meet customer and regulatory requirements through effective quality management systems.

3. ISO 14001: Environmental Management Systems

- **Key Points:**
- Fundamentals of environmental management.
- Implementing sustainability practices and reducing environmental impact.
- **Explanation:**
- This module focuses on ISO 14001, teaching participants how to integrate environmental management into business operations to reduce waste and manage resources efficiently.

4. ISO 45001: Occupational Health & Safety Management

- **Key Points:**
- Creating a safe workplace by identifying and mitigating risks.
- Health and safety compliance and continuous improvement.
- **Explanation:**

- Participants will explore ISO 45001 standards to understand how to develop and maintain an occupational health and safety management system that protects employees and reduces workplace risks.

5. ISO Auditing and Certification Process

- **Key Points:**
- The audit process for ISO certification.
- Internal and external audit procedures.
- **Explanation:**
- This module explains the steps involved in auditing for ISO compliance, including conducting internal audits and preparing for external certification audits.

6. Risk Management and ISO Compliance

- **Key Points:**
- Identifying risks and opportunities related to ISO standards.
- Integrating risk management into compliance strategies.
- **Explanation:**
- Learn how to assess and mitigate risks to ensure compliance with ISO standards while identifying opportunities for improvement within the management systems.

7. Documentation and Record-Keeping for ISO Compliance

- **Key Points:**
- Importance of maintaining accurate and up-to-date documentation.
- Developing and managing ISO-compliant records.
- **Explanation:**
- Participants will learn how to create, organize, and maintain the necessary documents and records required for ISO certification and compliance, ensuring accuracy and traceability.

8. Continuous Improvement and ISO Compliance

- **Key Points:**
- Strategies for ongoing compliance and process improvement.
- Implementing corrective actions and preventing non-conformance.
- **Explanation:**
- This module focuses on continuous improvement, teaching participants how to monitor compliance over time and take corrective actions when necessary to maintain ISO standards.

Who Should Attend

- Compliance managers, quality control officers, and environmental managers.
- Professionals responsible for health, safety, and environmental (HSE) compliance.
- Business leaders and department heads responsible for ISO implementation.
- Internal auditors and those involved in the ISO certification process.
- Individuals interested in learning about ISO standards and improving organizational compliance.
